

Drawing Celtic Knots

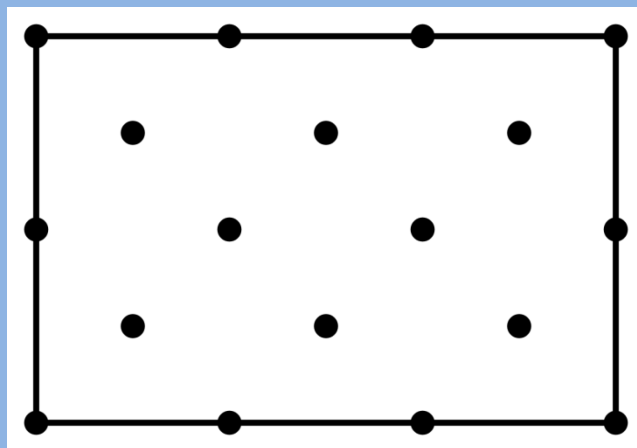

Although Celtic knots visually appear to be quite complicated, they are not very difficult to draw. Celtic knots can be drawn most easily on grid paper using the following process:

1. Draw a lattice of dots
2. Create a border by connecting the outer dots in the lattice
3. Trace one of the strands of the knot by drawing a strand that moves along the lattice diagonally and which turns when it comes to a wall
4. Continue until all strands are traced out
5. Darken the border of each strand
6. Color in the background, revealing the finished Celtic knot
